पेटेन्ट कार्यालय द्वारा जारी की गई पेटेन्टों और डिज़ाइनों से संबंधित अधिसूचनाएं और नोटिस

Notifications and Notices Issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta the 12th February 1966

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78 A of the Act

22nd January 1966

103552 Dynamit Nobel Aktiengesellschaft A process for the production of articles from chlorinated polyvinyl chloride

103553 George Angus & Company Limited Improvements in the manufacture of hose pipes (3rd February 1965)

103554 K V Ranganathan A process for increasing the sodium chloride content of common salt

103555 S C Hansoti Manufacture of agar—agar from Indian sea-weeds

103556 D D Sharma and R D Sharma Prefabricated roof for buildings

103557 Brown, Boveri & Company Limited Device for producing a multiphase arc with direct-current properties

103558 Daimler-Benz Aktiengesellschaft Improvements relating to internal combustion engines. (23rd November 1965)

103559 Outokumpu Osakeyhtio A method for preparing sulphur from sulphur dioxide containing gases

103560 Ernest Scragg & Sons Limited Improvements in or relating to apparatus adapted to false twist yarn (30th April 1963) [Divisional date 30th April 1964]

103561 Ernest Scragg & Sons Limited. Improvements in or relating to apparatus adapted to false twist yarn (30th April 1963) [Divisional date 30th April 1964]

103562 H Vissers Implement in introducing into, or depositing upon the ground a gaseous, liquid, pulverulent or granular material

103563. Ciba Limited Pesticidal preparations.

103564 Nestle's Products Limited. Fatty composition

103565 Imperial Chemical Industries Limited. Polyolefines shaping method (22nd January 1965)

103566 Imperial Chemical Industries Limited Woven fabrics (22nd January 1965) [Addition to No 91028]

103567 Imperial Chemical Industries Limited New peroxyesters and uses thereof (26th January 1965)

103568 Imperial Chemical Industries Limited Improvements in and relating to fertilizers (28th January 1965)

103569 Shell Internatonale Research Maatschappij N V Process for the separation of a wax-containing mixture

103570 Abbott Laboratories Process of enhancing the flavour or improving the texture of food products and the products so obtained

103571 Becker Drilling (Alberta) Ltd Method and apparatus for impact drilling of overburden

103572 Tractel Tirfor India Private Limited Traction apparatus for cable and wire

25th January 1966

103573 Fertilizer Corporation of India Limited A process for preparation of carbon black from carbon slurry produced during gasification of petroleum oils

103574 S R Sathe Prefabricated removable dam

103575 P M Manickam New design venky cycle engine

103576 K N Misra Typebodies meant for typewritters/teleprinters and the like *vis-a-vis* their corresponding keytops

103577 The British Drug Houses Limited Organic compounds (8th February 1965)

103578 Hindustan Lever Limited Process for dyeing hair (25th January 1965)

103579 H F Zock Silicon compounds (27th January 1965)

103580 Shell Internationale Research Maatschappij N V (2-(2,6-dihalophenyl)-4-hydroxy-5-carboxymethylthiazole and alkylesters thereof as herbicides (28th January 1965)

103581 Imperial Chemical Industries Limited Azo dyestuffs (2nd February 1965)

103582 Imperial Chemical Industries Limited Polymerisation process (10th February 1965)

103583. Robapharm A. G. New basic derivatives of benzoxazine and methods for their production.

103584. The English Electric Company Limited. Electrical protective devices. (10th February 1965).

103585. Rhone-Poulenc S. A. New dibenzocycloheptadiene derivatives and their preparation.

103586. V. S. Vaidya. Improvements in or relating to the design-construction/configuration of vibrating diaphragms used in loudspeakers/sound reproducers/acoustic transducers and such devices as are also used as microphones in intercommunication systems, particularly suitable when such diaphragms are made/manufactured from cellular high polymers like PVC, polystyrene, isoprene, chloropene polyurethane etc., instead of paper

103587. V. S. Vaidya. Improvements in or relating to the construction of loudspeakers/reproducers/acoustic transducers and such devices as are also used as microphones in intercommunication systems, regarding the location/position of the magnet assembly *vis-a-vis* the vibrating cone/diaphragm of such equipment.

103588. Phillips Petroleum Company. Process for polymerizing conjugated dienes.

103589. General Electric Company. Electrohydraulic process.

103590. General Electric Company. Potentially reactive, heat reactive modified polyarylene ethers.

103591. P. B. Irany and A. A. Iofin. High-voltage circuit breaker.

103592. Ramenskoe Otdelenie Vsesojuznogo Nauchno issledovatelskogo Instituta Geofizi-Cheskikh Metodov Razvedki. Perforator for drilling bore wells.

103593. Merck & Co., Inc. Purification of biological product.

103594. Sandoz Ltd. Improvements in or relating to organic compounds (26th January 1965).

103595. Sandoz Ltd. Improvements in or relating to organic compounds. (26th January 1965).

103596. Dow Corning Corporation. Improvements in or relating to a silicone latex.

103597. Badische Anilin- & Soda-Fabrik Aktiengesellschaft. Herbicidal composition.

103598. K. N. Misra. Curvet in typebodies meant for typewriters teleprinters and the like.

27th January 1966

103599. T. R. Krishnamurthy. Bala-baby-walker.

103600. Koppers Company, Inc. Improvements in or relating to the manufacture of coke.

103601. Phillips Petroleum Company. Improvements in production of hollow plastic articles. (15th Fabruary 1965).

103602. Siemens & Halske Aktiengesellschaft. Improvements in or relating to apparatus for moni toring gas-pressurised cables.

103603. Kurashiki Rayon Co., Ltd. Method of manufacturing sheet materials.

103604. Format Industrial Corporation Ltd. Foldable shelter structures. (23rd Gebruary 1965).

103605. Wilkinson Sword Limited. Improvements in or relating to the production of cutting edges. (28th January 1965).

103606. Textron Inc. Improvements in or relating to a line tie.

103607. Union Carbide Corporation. Hermetically sealed evacuated thermal insulating structure.

103608. Union Carbide Corporation. Self-sizing thermochemical scarfing.

103609. Holding Intercito SA. Apparatus for loading transport bands or the like with rod-like elements, particularly welding electrodes.

103610. Holding Intercito SA. Apparatus for counting and presorting of rods.

103611. Holding Intercito SA. Apparatus for jarring rods.

103612. Sperry Rand Corporation. Data processor set and indicate control systems.

103613 N. V Koninklijke Pharmaceutische Fabriken v/h Brocades Sthceman & Pharmacia. Process for the preparation of therapeutically useful compositions and pharmaceutical compositions containing them. (27th January 1965).

103614. F. Hoffmann-La Roche & Co. Aktiengeselischaft. Quinazolone or quinazolinone compounds and compositions containing the same. [Divisional date 27th September 1963].

103615. Ateliers De Constructions Electriques De Charleroi (ACEC). A circuit having two stable states.

103616. Continental Can Company, Inc. The condensation of monomer vapors to increase polymerization rates in an electrical discharge.

103617. Reynolds Metals Company. Extruded composite conductor rails and methods of making same.

103618. Stauffer Chemical Company. New compounds particularly effective against mite organisms.

103619 Stauffer Chemical Company Method of controlling mites.

103620. Ateliers De Constructions Electriques De Charleroi (ACEC). A circuit for establishing a condition of incompatibility between two or more logical variables.

103621. Brown, Boveri & Company Limited. Gasblast circuit breaker with multiple interruption.

103622. N. V. Philips Gloeilampenfabrieken. Improvements in the formation of coatings on germanium bodies.

103623 N V. Philips' Gloeilampenfabrieken. Improvements in semiconductor devices (29th January 1965).

28th January 1966

103624 I. R. Chhabra. Dispensing liquids from containers and transporting such containers.

103625. Dynamit Nobel Aktiengesellschaft. Process for the production of films, foils and fibres from polyhydroxymethylenes.

103626. B. V. Patankar. Prefabricated channel roof.

103627. J. M. Huber Corporation. Clay improvement.

103628. J. R. Giegy A. G. Process for the production of new 6-aminopenicillanic acid derivatives.

103629. Weston Laboratories, Inc Means and method for detacting the fertile period.

103630. Weston Laboratories, Inc. Method and means for detecting the fertile period.

103631. Shell Internationale Research Maatschappij N. V. Process for the preparation of fertilizer compositions.

103632. Shell Internationale Research Maatschappij N. V. Trav for contacting liquids and gases.

103633. Imperial Chemical Industries Limited. New organophosphorus compounds and pesticidal compositions containing the same (1st February 1965).

103634. M. & T. Chemicals Inc. Improvements in or relating to a process for preparing organotin compounds

103635. Ethyl Corporation. Chemical process. (31st August 1965).

103636 The British Non-Ferrous Metals Research Association. Improvements in or relating to foundry moulding sand compositions. (29th January 1965).

103637. M. D. Tendler. New antibiotic substances. [Divisional date 26th August 1963].

103638. Sodico McCann-Erickson S. A. Device for studying the eye movements of an observer scrutinizing an image.

103639. F. Hoffman-La Roche & Co. Aktiengesellschaft Beta-ionylidene acetaldehyde. [Divisional date 25th Febrauary 1964].

103640. Knapsack Aktiengesellschaft. Process for the manufacture of pulverulent ferromanganese.

103641. Ciba Limited. Pesticides and a process for their preparation.

103642. Ciba Limited. New sulphonamides. [Divisional date 8th January 1963].

103643. Ciba Limited. New sulphonamides. [Divisional date 30th March 1963].

103644. Ciba Limited. Basic ethers and pharmaceutical preparations containing the same. [Divisional date 31st January 1963].

103645. Ciba Limited. Basic ethers and pharmaceutical preparations containing the same. [Divisional date 16th April 1963].

Alteration of Date

103083. Ante-dated to 18th April 1964, under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

88468. North American Sugar Industries Incorporated. A process for refining esters of solid polyhydric alcohols. Accepted on 25th January 1966.

Comprises providing for the presence in the crude mixture one fluxing agent having 2 to 12 carbon atoms and containing 2 polar groups which are hydroxyl, carboxyl, carboxy ester and having oxygen present in the ratio of 1 atom per 3 atoms of carbon.

89336. M. M. Suri. Improvement in railway vehicle and bogie design. Accepted on 8th February 1965.

Wherein springs are provided to cause lateral thrust on wheels to tend it to displace closer to rails.

93203. Dresser Industries, Inc. Improvements in or relating to apparatus for pulsed well logging. Accepted on 10th January 1966.

Comprising a source of neutrons, at least one radiation detector, means for operating both the same and recording means interconnected with the detector.

93242. Indian Telephone Industries Limited. Improvements relating to electromagnetic vibratory devices. Accepted on 6th January 1966.

Comprising alternating current coils, pole pieces, a permanent magnet and an armature pivoted in between.

93272. F. B. Patel. A device for mounting tubular heating elements in water heaters. Accepted on 13th January 1966.

Comprising a disc or the like with a bent flange, a gasket and clamping means for securing the disc to the heater plate, said disc having appertures for passage of the heating elements.

93300. Imperial Chemical Industries Limited. New copolymers of 4-methyl pentene-1 and packaging container made therefrom. (18th April 1963). Accepted on 14th January 1966.

Comprising 4-methyl-pentene-1 and minor proportion of pentene-1 obtained by polymerisation of 4-methylpentene-1 in presence of stereospecific catalyst.

93305 Chiyoda Kako Kensetsu Kabushiki Kaisha. Method of constructing storage tank. Accepted on 15th January 1966.

A foundation of sand banking is built, a support member supports the side wall of the tank placed thereon, a temporary bottom member of flexible impervious film is fitted to the bottom of the tank, water is filled to effect sinking of ground, bottom member is removed, the ground surface is suitably altered and bottom platings are attached to the tank.

93360. M. & T. Chemicals Inc. Process for the preparation of novel organobismuth compound or a polymer thereof, said compound or polymer so prepared and a novel baterisostatic composition containing the same. Accepted on 18th January 1966.

Reacting an acid or reactive derivative thereof with a suitable organobismuth compound.

93393. Imperial Chemical Industries Limited. Improvements in or relating to the dyeing and waterproofing of fabrics. (23rd April 1963). Accepted on 21st January 1966.

The fabrics are treated in an aqueous medium compressing a silicon water-proofing composition, an alkaline catalyst and a dyestuff.

93441. Etablissement Salgad. Percussion detonator for projectiles. Accepted on 22nd January 1966.

Having a primer carrier being under spring action and cooperating indirectly with the balance mechanism and between the balance plate and the carrier a reducing type gear transmission being inserted.

93480. Debakiranjan Dutta. Improvements in and relating to electrical connectors, cut-outs and the like. Accepted on 27th January 1966.

Consists of an insulator housing having a base part and a top part wherein both the said base and top parts contain a small pieces of conducting metal having small holes placed in the grooves in the body of the insulator.

93486. Dow Corning Corporation. Method of retarding paraffin deposition in petroleum containers. Accepted on 21st January 1966.

The inside of the container or conduit is contacted a siloxane copolymer consisting essentially of 0.25 to 10 mol per cent of a siloxane unit.

93546. Halcon International, Inc. Process for the preparation of hydroxycarboxylic acid and/or derivatives thereof. Accepted on 22nd January 1966.

Peroxide precursor is contacted with a catalytic Group VI metal compound and rearranged.

93575. Council of Scientific and Industrial Research. Improvements in or relating to the manufacture of tiles from plastic clays. Accepted on 25th January 1966.

Characterised in that drying losses are reduced by treating the soil with ammonium chloride, in the proportion of ammonium chloride producing minimum values of degree of dispersion and plastic limit.

93675. Tecalemit (Engineering) Limited. Improvements in air filters for internal combustion engines (10th May 1963). Accepted on 21st January 1966.

Wherein the casing comprises a lower body part having an air outlet and a cover having an air-inlet and wherein the filter element includes at least one layer of a filter material and wherein means are provided for clamping the cover and body part together.

93681. Council of Scientific and Industrial Research. Production of anodic coatings or black colour on copper or copper rich alloys. Accepted on 27th January 1966.

Consists in passing a direct current through an electrolyte using stainless steel cathode at a curent density range of 15–40 amp/sq. ft. and room temperature.

93779. International Nickel Limited. Electro-deposition of nickel from solutions of nickel sulphamate Accepted on 28th January 1966.

Electrolytic bath contains from 500 to 700 g/l nickel sulphamate.

94024. Pittsburgh Plate Glass Company. Glass article, composition thereof and method of preparing said article. Accepted on 25th January 1966.

Comprises contacting soda-lithia-P_2-O_5-alumina-silica glass with a salt of an alkali metal of larger atomic diameter than lithium at a temperature below the strain point of the glass.

94030. Siemens-Schuckertwerke Aktiengesellschatt. A process for the electrophoretic production of a mica layer upon a metallic substratum. Accepted on 25th January 1966.

Comprises preparing an aqueous dispersion that is stabilized by inclusion of an emulsifier, and mica is deposited electrophoretically from the dispersion onto the substratum.

94284. N. V. Philips Gloeilampenfabrieken. Improvements in and relating to devices for use in an automatic telephone system. Accepted on 16th December 1965.

Comprising bilateral connection circuits, connecting means for connecting lines of a first sub-group of the second groups of lines.

94566. International Nickel Limited. Improvements in and relating to welding of ferritic nickel steel and to filler wire for use therein. (20th August 1963) [Addition to No. 89868]. Accepted on 6th January 1966.

A method in which parts of ferritic nickel steel are welded by gas shielded arc welding with a wire filler in which the filler contains not more than 200 parts per million oxygen not more than 100 parts per million nitrogen and not more than 3 parts per million hydrogen.

94589. The Boeing Company. Manufacture of laminates Accepted on 7th January 1966.

Comprising the steps of applying heat to a laminar assembly comprised of a layer of air permeable thermoplastic material sandwiched surface to surface between layers of bleeder material.

94638. Deutsche Gold-Und Silber-Scheideanstal. Vormals Roessler Process for improving the properties of halogen-containing thermoplastic polymers [Addition to No. 79422]. Accepted on 9th January 1966.

Reacting the polymers with (1) a salt of at least one phosphorous acid or one phosphorous acid compound and (2) with at least one polyamine having two amino groups without the use of a catalyst.

94673. Farbwerke Hoechst Aktiengesellschaft, vormals Meister Lucius & Bruning. Granulated fertilizers and process for their manufacture. Accepted on 13th January 1966.

By condensing urea with an aldehyde comprises adding to the starting products, prior to the condensation, a swellable substance for example modified cellulose.

94674. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Condensation products of urea and aldehydes and process for making them. Accepted on 13th January 1966.

Urea is condensed in a granulating apparatus with an aldehydes and formaldehyde.

94684. Palitex Project-Company G.m.b.H. Method of and apparatus for controlling bobbin change in double-twist machines. Accepted on 13th January 1966.

Comprises in changing together at least one creel bobbin and a doubler bobbin or doubler bobbin core so that they form a unitary group throughout unwinding is completed.

94689. Ciba Limited. Improved pesticidal compositions Accepted on 13th January 1966.

Comprises (i) an insecticidal organic phosphorous ester; (ii) milk powder; (iii) a carbohydrate and antioxidants, dispersing and thickening agents, solvents, fillers and adhesives.

94695. The English Electric Company Limited. Production of fuse elements. (19th July 1963). Accepted on 14th January 1966.

The method includes the steps of coating portions of the front surface of a strip or sheet of fusible metal with etchant-resistant material, applying to the back surface of the strip on etchant-resistant strip supporting layer and dissolving off the strip supporting layer.

94698. Sunbeam Corporation. A sole plate and a heating and steam generating subassembly for a pressing iron. Accepted on 14th January 1966.

Including a heating element embedded in the sole plate and having terminals accessible from one end of the said sole plate, means defining a steam generating chamber, and a plurality of ports interconnecting said steam generating chamber.

94704. Societa Edison S.p.A. Settore Chimico. Process for the polymerization of alpha-olefins. Accepted on 14th January 1966

The polymerisation is carried out in the presence of organic solvents and also of the catalyst system obtained by reacting chromyl fluoride with a carrier containing silicon compounds and subsequently activated by heating in an oxygen stream.

94717. Buckman Laboratories, Inc. Improvements in or relating to compositions containing monosubstituted 2-bromoacetophenones. Accepted on 15th January 1966.

The composition comprises a monosubstituted. 2-bromoacetophenone and a solvent which may be a glycol ether or an ester and preferably a dispersing agent.

94723. Asahi Kasei Kogyo Kabushiki Kaisha. Method for measuring maturity of viscose solution. Accepted on 15th January 1966.

Adding an aqueous urea solution of definite concentration to previously weighed viscose followed by definite amount of normal solution of ammonium sulphate containing a definite amount of urea to cause coagulative precipitation and determining transmittance of the solution.

94725. Asahi Kasei Kogyo Kabushiki Kaisha. Pot covers for spinning machines for synthetic fibers. Accepted on 15th January 1966.

Comprises a disc with an annular groove and an annular resilient member slidably received in said groove.

94731. Indian Oxygen Limited. Means for initiating electric arcs between spaced electrodes. (25th July 1963). Accepted on 17th January 1966.

In the arch system a capacitor is arranged to discharge directly into the ionised arc gap and not through inductive means when the arc gap is ionised

94740 Dr Beck & Co G m b H Electro insulating varnishes and processes for their manufacture Accepted on 17th January 1966

Dissolving the polyesterimide resin formed by reacting a polybasic acid component with a polyhydric alcohol component consisting of or including pentaerythritol, atleast one of the components contains atleast one imide group the phenolic solvents

94746 B R D Company Limited Improvements in or relating to universal joints (27th July 1963) Accepted on 17th January 1966

Sealing ring of elastomeric material being provided at the junction between the inner end of each bearing cup and its associated arm of the spider

94757 Chromalloy Corporation Production of sintered slender shapes such as a slender die element Accepted on 18th January 1966

Characterised in the steps of forming as a unitary assembly a plurality of compressed slender shapes sintering at 700°C, cooling it and separating the sintered shapes from each other by severing the connecting webs along their lengths

94759 Ciba Limited A process for protecting organic materials which may be affected by ultraviolet rays, from the harmful action of ultraviolet rays Accepted on 18th January 1966

A new hydroxy-phenyl-1, 3 5-triazine is admixed in liquid or molten state in the organic material to be protected from the damaging effect of ultraviolet rays or is fixed by a fixing operation as usual in dyeing process on the material to be protected

94763 The Goodyear Tire & Rubber Company Improvements in apparatus and method for the production of a plastic article. Accepted on 18th January 1966.

Foamable mixture is discharged from a dispensing unit into a mould and the mould is moved relative to the dispensing unit at a variable speed

94789 Buckman Laboratories, Inc Compositions containing methylene bisthiocyanate and processes of utilizing the same Accepted on 21st January 1966.

A composition comprising methylene bisthiocyanate, a dispersant and a dimethylamide

94793 Esb-Reeves Corporation Improvements relating to microporous plastic materials, including articles of clothing having coatings of such materials Accepted on 21st January 1966

Intimately mixing a plastic material with a plasticizer shaping the mixture and removing atleast a portion of plasticizer with a leaching agent in which the plastic material is insoluble

94797 M Y Noorani Improvements in or relating to pleated neckties Accepted on 21st January 1966

The front surface of the fabric envelope having along its length, wholly or in part, one or more bore bore pleats formed from the fabric itself

94829 Sperry Rand Corporation Fluid pulse duration control means Accepted on 21st January 1966.

The above invention comprises an inlet and two outlet channels, an utilization and an exhaust ports

94842 Societe Metallurgique D'Imphy Process for reducing ore containing one or more of the oxides of chromium, manganese and iron Accepted on 25th January 1966

A metallic bath containing atleast one of the metals Cr, Mn and Fe is made up in a furnace having a non-vertical axis revolution and the furnace is mounted to pivot about the axis of revolution a carbonised material and one to be reduced are added to the bath, the furnace being rotated and heated above the bath in the presence of blower oxygen

94861 Owens-Corning Fiberglas Corporation Apparatus for producing high strength, highly refractory glass filaments Accepted on 21st January 1966

The invention comprises a heater member, power means, a plurality of bushing and a temperature control system

94889 Barmer Maschinenfabrik Aktiengesellschaft Apparatus for spinning synthetic thermoplastic materials (6th November 1963). Accepted on 25th January 1966

Nozzles spinning pump arranged between the extruder screw and the extruder nozzle

94892 Shell Internationale Research Maatschappij N V. Process for the preparation of lubricating oils from residual petroleum fractions containing asphalt Accepted on 27th January 1966.

Extracting asphalt-containing residue with a C_3+ hydrocarbon/alcohol mixture, separating the oleaginous extract phase from liquid asphaltic raffinate phase, removing atleast partially C_3+hydrocarbon/alcohol mixture from the extract phase and subjecting deasphalted oil to catalytic hydrogenation

94898 Allied Chemical Corporation Process for the preparation of trifluoroacetic acid Accepted on 22nd January 1966

Hydrolysing trifluoroacetyl chloride by adding to water, distilling reaction mass to obtain distillate of trifluoroacetic acid boiling at 72°C

94901 Imperial Chemical Industries Limited Production of shaped plastic strip. (30th July 1963) Accepted on 27th January 1966.

Extruding organic thermoplastic material through a slit die to produce a substantially flat strip which is partially cooled and then bent by passing between nip rolls

94934 Sandoz Ltd Process for dyeing and printing of leathers Accepted on 25th January 1966

Azodyes in a formamide solution are applied to the leathers

94938 Standard Telephones and Cables Limited A rectangular-code regenerator. Accepted on 22nd January 1966

Comprising an input signal source, detecting means connected to receive input signals means connected to both for generating train of signals means connected to receive the train of signals and clock pulses for forming and reading out a pulse for each signal element of train substantially during the interval in which element is being generated

94939. Harbison-Walker Refractories Company Method of applying by gun a granular refractory material on its site of use to form a refractory monolithic lining. Accepted on 28th January 1966

Comprising adding to a selected metal oxide refractory material and tempering agent from 0 2 to 5 parts by weight of cellulosic pellicle to about 100 parts by weight of the refractory material

94944 Deere & Company. Harvester with shiftable and reversible conveyor means Accepted on 22nd January 1966.

Machine with automatically reversible driving means so that the two conveyors drive toward each other in the counter-delivery aspect and drive in the same direction to perform essentially as a single conveyor in the end-delivery aspect

94945 M Shanker A dewatering machine for clothes and fabrics Accepted on 27th January 1966.

Comprising an outer casing a perforated basket or cage housed therein, a motor rotating the said basket and a drain spout formed in the casing for removing the liquid

94959 Societe D'Electronique Et D Automatisme Low voltage high direct current dynamoelectric machines Accepted on 20th January 1966

Combination of stator including an heteropolar field-structure of permanent magnet poles and defining a magnetic air gap, a rotor within the air gap comprising a plurality of conductor blades and brushes each short-circuiting at least two conductor blades at ends not otherwise short-circuited

95010 Pirelli Societa Per Azioni Improvements in and relating to butyl rubber compositions (10th June 1964) Accepted on 27th January 1966

Containing as antiadhesive agent a saturated aliphatic monohydric alcohol having a flash point above 170°C in an open cup, or a mixture of such alcohols

95047 Borg Holding A G Metal surface treatment. Accepted on 25th January 1966

Comprises treating the surfaces with an aqueous solution containing a mixture of one or two or more sequestering agents, the pickling treatment being commenced at pH below 9 and pH value being raised during pickling to at least 9, and then added towards the end an oxidising agent

95054 Vulcan Materials Company Process for treating pentachlorophenol Accepted on 27th January 1966.

Pentachlorophenol is contacted with a hot gas at a temperature above the melting point of tetrachlorophenol and below the melting point of pentachlorophenol

95151 Badische Anilin- & Soda-Fabrik Aktiengesellschaft Process for stabilizing polyamides, and polyamides so stabilized Accepted on 27th January 1966

Polyamides may be stabilized by adding thereto a mixture of a soluble copper compound and a halolactam.

95179 The Metal Box Company of India Limited Improvements in or relating to pilferproof closures for bottles, jars and like containers Accepted on 21st January 1966

Characterized in that the weakening line or each of the weakening lines extend beyond the top edge of the sealing ring across one or more of the bridges so that each bridge thus divided across virtually becomes two bridges

95274 Kurashiki Rayon Company Limited Process for the preparation of modified viscose rayon Accepted on 21st January 1966

Viscose containing a modifier is spun into a spinning bath containing wath containing certain critical amounts of H_2SO_4, Na_2SO and $ZnSO_4$

95349 N V Philips Gloeilampenfabrieken A device for the simultaneous filling of recesses or groups or processes in a holder with a number of elongated articles Accepted on 22nd January 1966

Characterized in that it is provided with a vibrating container having a number of storage chambers which can each contain an upright bundle of elongated articles

95358 Dunlop Rubber Company Limited Segmental belting (12th September 1963) Accepted on 21st January 1966

A reinforcement of one or more layers of a woven or non-woven textile fabric or of steel cords embedded in a flexible material and having castelled ends comprising ferrules

95404 International Nickel Limited Low-alloy steel Accepted on 28th January 1966

Alloy steel containing C from 0 04 to 0 25% Ni from 4 5 to 10% Al from 0 6 to 1 2% MO W or both from 0 5 to 2%, Mn up to 0 5%, Co from 0 to 5% Cr 0 to 1 5% and Cu 0 to 2 with Ni/Al from 1 to 5, balance being iron

95450 Associated Electrical Industries Limited Improvements relating to systems for controlling the excitation of polyphase machines (4th September 1963) Accepted on 25th January 1966

Exciting winding unidirectional exciting current, rectifier bridge ac source, controlled rectifier, controlled circuit

95451 Associated Electrical Industries Limited Improvements relating to systems for controlling the excitation of polyphase machines (27th January 1964) Accepted on 25th January 1966

Exciting winding unidirectional exciting current, rectifier bridge ac source, control circuit

95726 Allied Chemical Corporation Process for purifying organic isocyanates Accepted on 28th January 1966

The isocyanate is heated with copper, silver nickel iron zinc or an oxide of these metals

103083 M & T Chemicals Inc A method and novel bacteriostatic composition for protecting of material [Divisional date 18th April 1964] Accepted on 18th January 1966

A method for protecting a material such as plastic textile paper and paints comprises applying to the material an effective amount of a novel organobismuth compound or a polymer thereof or a compositions comprising the said organobismuth compound or a polymer thereof and a carrier therefor

Correction of Clerical Errors

Under Section 62 of the Indian Patents and Designs Act 1911 certain clerical errors occurring in the specification in respect of patent No 89434 has been allowed
